

**ONESOURCE
BIODIVERSITY COMMITMENT
STATEMENT**

OneSource Specialty Pharma Limited's Commitment to Biodiversity Conservation

As a Contract Development and Manufacturing Organisation (CDMO), OneSource Specialty Pharma Limited (“OneSource” or “We”) recognises that our responsibility extends beyond delivering high-quality pharmaceutical solutions for our customers. We are committed to acting as responsible custodians of the environment and championing the protection and restoration of biodiversity and acknowledging that the health of our ecosystems is vital to the sustainability of our operations and the wellbeing of the communities we serve.

Strategic Approach to Environmental Stewardship

Biodiversity conservation forms a cornerstone of our environmental sustainability strategy and carbon footprint reduction initiatives. We are dedicated to protecting local ecosystems, flora, and fauna in all areas where we operate. We maintain strict no-deforestation policy, ensuring our operations do not contribute to the degradation of forests or natural habitats. As a CDMO serving global pharmaceutical clients, OneSource is committed to conducting its operations in a manner that protects ecological balance and preserves the natural environment. Biodiversity conservation is integrated into OneSource's broader climate strategy, supporting initiatives to reduce emissions and achieve long-term sustainability goals.

Implementation Framework

OneSource's biodiversity conservation efforts are structured around:

Site-Specific Mitigation Measures: We have developed tailored biodiversity roadmaps for each of our manufacturing facilities. These roadmaps establish location-specific conservation strategies designed to address local ecological needs and respect sensitivity.

Responsible Operations: Our facilities are strategically located outside ecologically sensitive areas, including national parks, wildlife sanctuaries, and biodiversity hotspots. This deliberate approach ensures that our operations do not encroach upon or disrupt critical habitats.

Green Infrastructure: Our commitment to biodiversity conservation is demonstrated through active plantation programs. During FY26, OneSource successfully planted over 1,300 trees around our manufacturing facilities, reinforcing our dedication to ecological stewardship. Our campuses and surrounding areas now host over 2,000 trees and plants, creating green corridors that support local biodiversity.

Community Partnership: Aranya Dhama – Forest Conservation, Reforestation and Biodiversity Park Development

OneSource's flagship environmental initiative, Forest Conservation, Reforestation and Biodiversity Park Development, exemplifies our commitment to biodiversity conservation beyond our operational boundaries. In partnership with the forest department of the Government of Karnataka, we actively maintain and enhance around 100 acres of the Kumbaranahalli State Reserve Forest through:

- **Fire Prevention Program:** Under our "Zero Fire" initiative, we equipped the forest department with essential firefighting tools including blowers, brush cutters, and fire beaters.
- **Habitat Protection:** We have undertaken comprehensive repair and reconstruction of forest compound walls as a part of its commitment to biodiversity conservation and ecosystem protection.
- **Ecosystem Preservation:** Our efforts contribute directly to protecting the region's rich flora and fauna while supporting SDG 13 (Climate Action) and SDG 15 (Life on Land).
- **Development of a Biodiversity Park:** To establish OneSource Model Biodiversity Park as a model of ecological restoration and conservation, fostering a deeper connection between people and nature through education, recreation, and community engagement.

Our Promise

As a trusted CDMO partner, OneSource pledges to continue integrating biodiversity conservation into our operational excellence framework, ensuring that our pharmaceutical manufacturing capabilities contribute positively to environmental sustainability while delivering the pharmaceutical solutions our clients and their patients depend upon.

This commitment reflects OneSource's dedication to responsible manufacturing practices and our role as environmental stewards in the pharmaceutical industry.
